

Pseudocode

1. Start
2. Get the car model year, and compute age ($2024 - \text{year}$).
3. Get number of accidents.
4. Get premium options (yes/no).
5. Get MSRP.
6. Check eligibility: If $\text{age} \leq 10$ and $\text{accidents} \leq 3$, continue; else, print ineligible message and exit.
7. Determine resale percentage:
 - Age:
 - $\leq 4 \rightarrow 85\%$
 - $5 - 8 \rightarrow 63\%$
 - $9 - 10 \rightarrow 45\%$
 - Accidents:
 - $1 \rightarrow -2\%$
 - $2 \rightarrow -10\%$
 - $3 \rightarrow -20\%$
 - Premium options:
 - Yes $\rightarrow +5\%$
8. Compute resale price ($\text{MSRP} * \text{resale percentage} / 100$).
9. Print resale price.
10. End.
